

WATER MATRIX LAUNCHES TCE LATEST ZERO-FLUSH® WATERLESS URINAL MODELS

The Zero-Flush® Waterless urinal is the latest in no-water urinals. It has incorporated a system that only requires simple maintenance after 15,000 uses. It consists of a permanent housing within the drain opening that has a total liquid capacity of 46 oz., 12 ounces is the Blue Seal Odour barrier liquid. With this large amount of Blue Seal liquid, it will never have to be topped-up in between drain insert replacements. This ensures less physical maintenance, which results in less operating costs. The models have been aesthetically designed for the modern world and to reduce splash back concerns that have been associated with existing urinals.

**WATER MATRIX IS THE LEADING PROVIDER OF WATER EFFICIENT PRODUCTS AND SERVICES IN CANADA.
ESTABLISHED IN 1989.
DEDICATED TO REDUCING CLIENTS' OPERATING COSTS, WHILE CONSERVING PRECIOUS WATER.**
