PERFORMANCE

The Proficiency harnesses the energy of water filling the tank to pressurize the trapway via a patented air transfer system. When flushed, air is sucked out of the trapway, initiating the highly efficient siphonic action. This new technology gives the Proficiency the leading edge in water efficiency. It has the largest trapway (60mm ball pass test) of any siphon toilet which makes it basically clog free. The waterspot is one of the largest in the industry – greatly aids with scouring the bowl and keeping it clean. Commercial grade performance with 1000 MaP rating.
